

**Chartered Surveyor Degree Apprenticeship Quantity Surveying BSc (Hons)**  
**4 years - part time online delivery | September start | Study with Northumbria University (Online)**

Our degree apprenticeship programme is a great opportunity to study towards a degree qualification while putting everything you have learnt into action through on-the-job training, and you will be earning a salary too!

With over 100 years of history and sustainable growth, Walter Thompson is the major contracting arm of the FT Construction Group who are one of the region's largest Privately Owned Construction Groups with an enviable reputation for quality and providing excellent long term career opportunities within the construction industry.

**A Degree Apprenticeship in Quantity Surveying will provide you with the experience, training and support needed to become a future Quantity Surveyor or Estimator.**

**Quantity Surveyors** oversee the commercial side of our building projects. This includes the analysis, preparation, and management of all costs, from initial build cost assessments though to site completion. You'll also manage sub-contracts and materials required to make the build as effective as possible. You'll assist the site team in leading the development of a site from a cost perspective and liaise with trades and costing materials and goods. All this while meeting a challenging schedule, within budget, and with a focus on quality and customers.

**Estimators** are involved in projects from the outset, providing cost estimates on how much a project is anticipated to cost, the Estimating role is varied and diverse working on minor projects through to multi-million-pound schemes. The Estimator role does not stop once the estimate has been completed and you will be expected to assist the Quantity Surveyors and the Commercial Team throughout the construction stage of a project.

For both roles, we're looking for exceptional people with enthusiasm, self-motivation, excellent communication skills, a methodical approach to problem solving, competent IT skills and a positive determination and ambition to succeed.

In partnership with Northumbria University, we will support the apprentice at work to achieve their apprenticeship. Whilst studying, the apprentice will be required to work full-time, for at least 30 hours a week, and will be supported through learning at work to achieve the requirements of the apprenticeship standard.

**Entry Requirements:**

120 UCAS Tariff Points from a combination of an acceptable Level 3 qualification which may include A-Levels or BTEC Diplomas/Extended Diplomas.

You must also have GCSE grades C/4 or above in English Language and Maths.

**What we can offer you:**

- Walter Thomson will provide support and funding to help you achieve your degree qualification in Quantity Surveying
- We will give you the support to help you succeed
- A competitive apprentice salary and benefits
- Fantastic career progression beyond the apprenticeship
